

Mariana Islands (1521 – 1898) documenting coffee growing activity which DLNR received out of the U.S. Library of Congress through Congressman Kilili's office, and his staff Ms. Tina Sablan and Washington D.C. staff.

Rota Island awaits UCC's coffee bean test results...while the Rota Island Specialty Crop Association (RISCA) take steps to propagate Rota *Coffea Arabica* coffee. RISCA and the Rota mayor's office are calling on the Rota community to help us help ourselves establish the *Rota Island Mountain Coffee* brand. Get ready Rota! Thank you KFC Triathlon Club for introducing Rota *Coffea Arabica* coffee to UCC and for helping Rota Island. To read more of KFC Triathlon Club's story on Rota coffee, please visit their website at kfcetriathlon.com. Below are UCC coffee products produced in Hawaii and Jamaica.

KFC and support staff then dug into old Japanese archives about coffee during the Japanese colonial era. What they found astonished them. According to KFC, their findings and document translations found that both the Spaniards and Japanese reported that coffee grown in the highlands of Rota Island were found to be the best in the Marianas and of high quality.

So until our next publication of *Gasetan Lancheron Luta* - adios Marianas!
